

[Enterprise Authentication Provider SecureReset Acquired by Courion](#)

Acquisition to enhance Courion's PasswordCourier with multi-factor authentication and mobile password reset

ATLANTA, November 11, 2015 - [Courion](#)[®], the market leading provider of intelligent Identity Governance and Administration (IGA) solutions, announced today the acquisition of SecureReset, an innovative provider of cost-effective, secure, and user-friendly authentication solutions for enterprise password reset. The acquisition will enable Courion to extend its technology leadership by adding multi-factor authentication and mobile password reset to Courion's popular PasswordCourier product.

SecureReset is a complete solution for secure, automated password resets. The system supports resets for enterprise systems including leading directories, file servers, UNIX servers, databases and ERPs. SecureReset has more than 15 years of experience in network password reset with recognized expertise in IT security and voice user interface design.

“With this acquisition we will be able to include SecureReset's innovative products immediately into our PasswordCourier product which will give us the opportunity to provide more valuable services to our customer base,” said David Earhart, CEO at Courion. “This acquisition will give us the ability to expand our offerings in the IAM market and will be paramount in our bold plans for the future of Courion.”

“As part of the Courion family, we will be able to keep even more enterprises secure,” said Andy Osburn, founder of SecureReset. “Adding our technology to Courion will help to ensure Courion's continued market leadership in information security.”
